European Master of Science in Information Systems Management

SEB LU (School of Economics and Business)

Ljubljana University (Slovenia)

NOVA IMS (NOVA Information Management School)

Universidade NOVA de Lisboa (Portugal)

Successful businesspeople accept the challenges brought about by the transition to an information society. They build their businesses and careers on new findings in management, operations and the application of information systems and technologies.

Completing the master degree program will make the master student an expert who, as a businessperson or information systems specialist, will be able to directly and creatively manage, advise and participate in the development and application of information systems technologies, manage information systems departments, and manage changes leading to the strategic renewal of businesses based on the restructuring of business processes and application of information technology.

Goals

The goals of the program are to:

- Develop the understanding of the strategic benefits in successfully implementing information systems, the process of strategic planning and the evaluation of business needs.
- Develop the project management and capital budgeting skills to enable activity, program and project costing, control and evaluation.
- Develop an appreciation of the impact and management of change caused by the introduction of information systems.
- Develop the ability to manage, advise and participate in the development and application of information resources and the ability to manage changes towards the strategic renewal of business based on the application of information technology and the restructuring of business processes.

Who is it for?

The program is aimed at graduates in management, engineering, economics, marketing, information management, and professionals in information technologies, network and computer systems administration and database administration, among others, who are willing to acquire additional Information Systems Management skills to be applied in their professional field.

Degree Obtained

After fulfilling all their obligations, the student earns a master's double degree from both universities. The institutions award the following titles:

- M.Sc. in Information Management, with a specialization in Information Systems and Technologies Management, by NOVA IMS, Universidade NOVA de Lisboa - Ranked by Eduniversal as the best Master Program in Information Systems Management in Portugal and in Western Europe;
- M.Sc. in Business Informatics by SEB LU, University of Ljubljana, accredited by AACBS.

Accreditations

The prestigious iSchools association has distinguished NOVA IMS as one of the world's best universities in research and teaching in Information Management, being the first Iberian university to join iSchools. Also, NOVA IMS' Quality Management System has been certified by APCER (Portuguese certification entity) and IQNET (International Certificate Network) according to NP EN ISO 9001:2008.

Six of NOVA IMS' Master and Postgraduate Programs were ranked in the world TOP of the Best Masters Ranking 2019, by Eduniversal. One of the degrees that the European Master of Science in Information Systems Management awards is the Master's degree in Information Management, with a specialization in Information Systems and Technologies Management. This specialization was ranked as the best Master Degree Program in Information Systems Management in Western Europe, by Eduniversal.

The SEB LU has been awarded accreditation by both the AACSB (the Association to Advance Collegiate Schools of Business) and EQUIS (the European Quality Improvement System). The SEB LU is the first school in Central and Eastern Europe to be awarded with AACSB accreditation.

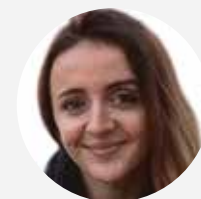

Testimonials

Ceren Cakmak

Turkey

As I have a lot of consultant friends from Portugal, when I told them I wanted to continue my education, in a master program, they advised me to come to NOVA IMS. The professors are very helpful especially for foreign students: they are very sensitive and try to help us all the time. They're so kind. I feel very comfortable here.

Natasa Kuposovic

USA

The best thing I found about my master program at NOVA IMS was the fact that, aside from academic/theoretical parts that we learn, there's also a real and practical approach that gives an idea of what's going to be to have a career in Information Systems.

Coordinators of the Program

Miguel de Castro Neto (NOVA IMS)

Peter Trkman (SEB LU)

Applications

The applications are online, in NOVA IMS' Applications Portal, in the following link:

www.novaims.unl.pt/candidaturas

The selection process includes the analysis of the applicant's academic and professional curriculum and an interview.
