Objective: Configuration of VPN (SSL) network in Windows.

## Index

Configuration.....	4
Introduction.....	3
Uninstall older version.....	10

# Introduction

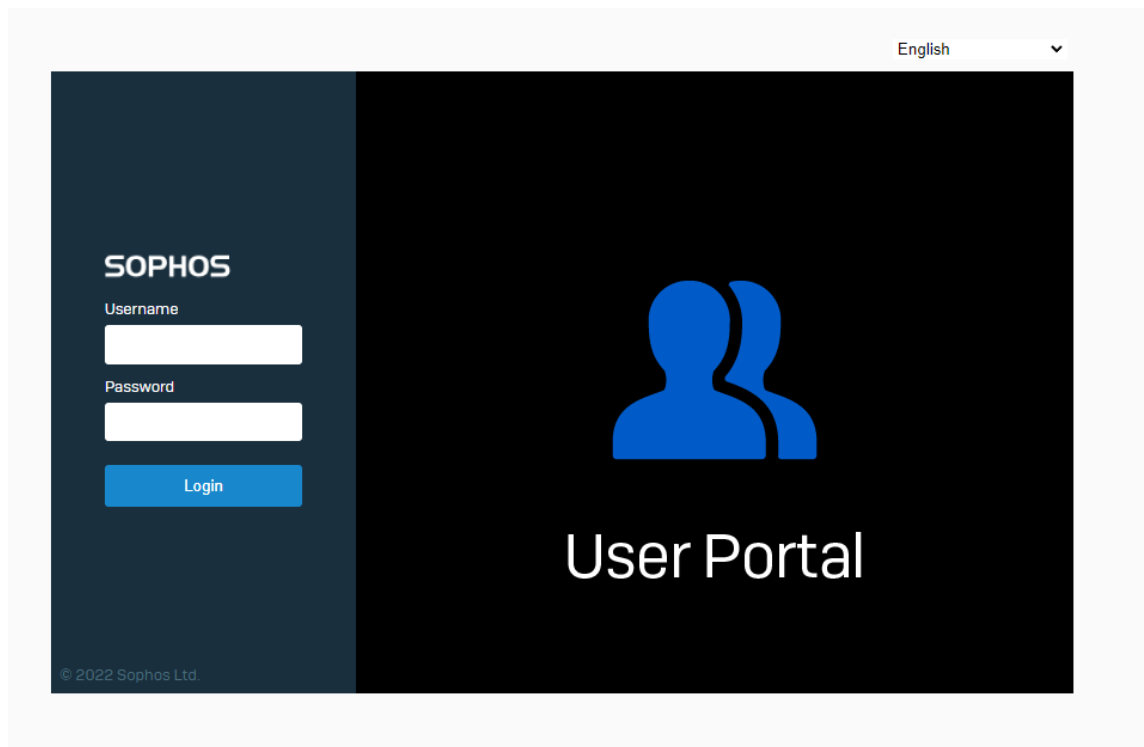

---

This document has the main goal to explain the process of configuring the access to VPN (SSL) wireless network on Windows environment.

# Configuration

---

1. If you have a Sophos SSL Client already installed, please go to “**Uninstall older version**” topic before continue the installation of this version.  
Access to: <https://vpnsslms.novaims.unl.pt:4443> , and login with your credentials ( same as all institutional portals ) .

2. Select “VPN ” and then choose in Sophos Connect client section “Download for Windows” and choose in VPN configuration section “Download for Windows”.

**SOPHOS**

- Home
- Personal
- Download client
  - VPN**
  - Internet usage
  - Email
  - Logout
